

**The  
Stone & Granite  
Company LLC**

**Your rock-solid source for  
all natural and engineered  
finished stone products.**

# Committed to providing quality like no other in the industry.

*Welcome to The Stone & Granite Company, home of beautiful, functional and affordable stone and granite – both natural and engineered. Whether you're a designer, architect, contractor or builder, we feature a wide array of options that will perfectly top anything you can imagine. In addition to our amazing materials, The Stone & Granite Company can help design, engineer, fabricate and install any size project. It's our commitment to provide you with the highest quality materials that look beautiful and work for you, year after year.*

## **Natural Stone**

Materials that are quarried in large blocks, cut into slabs and fabricated into a final product. Their beauty includes naturally occurring shade, color and grain variations, but each slab in the series is similar to the ones before and after it.

**Granite • Marble • Limestone • Slate • Onyx • Quartzite  
• Sandstone • Soapstone • Lava Stone**

## **Engineered Stone**

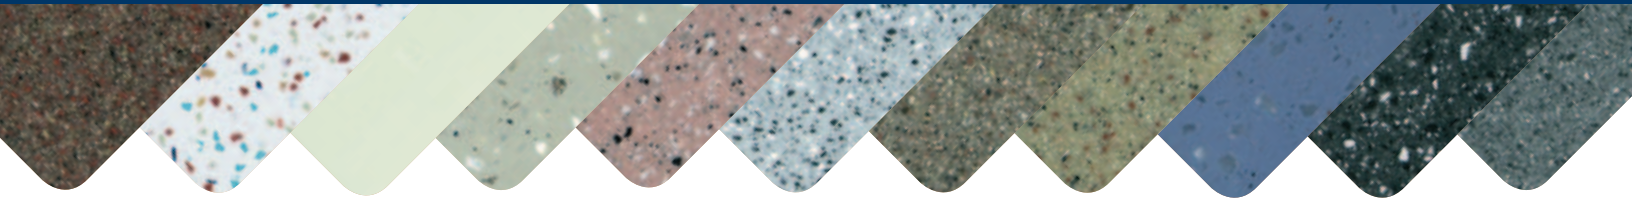

Engineered stone is manufactured using a stone aggregate combined with resin and color pigment to create a natural-looking stone. Made up of 93% quartz, engineered stone countertops create a very hard surface and are extremely durable.

**Silestone • Caesarstone • Technistone • Cambria • Hanstone  
• LG Viatera • Portifino & Dupont Zodiaq**

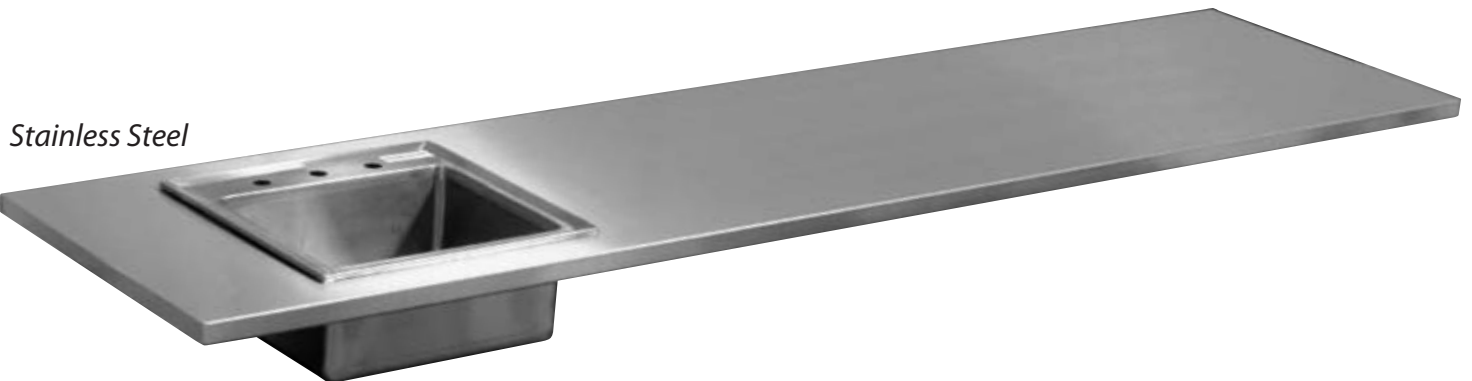

# Unsurpassed solid surface material, laminates and stainless steel countertops.

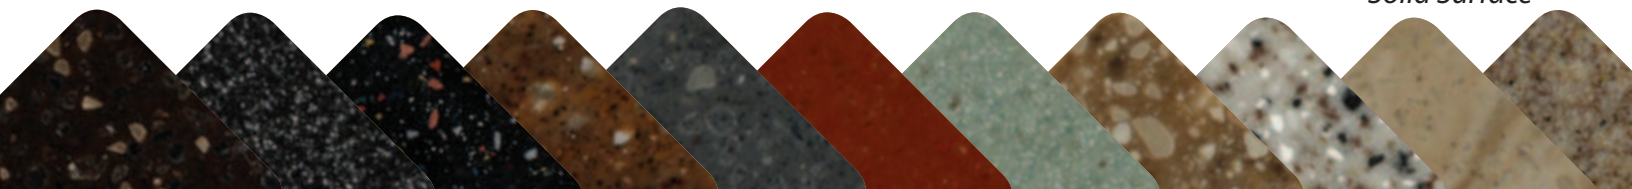

Laminate

*As the perfect complement to our outstanding natural and engineered stone products, The Stone & Granite Company also offers custom solid surface material, laminate and stainless steel countertops. By offering such a wide array of material choices in combination with virtually unlimited design styles and configurations, The Stone & Granite Company will provide you with exactly the right material in the right style at the right price.*
