CEILING MOUNT

Amtekco's styles of pot racks enable the vertical space of the deli and bakery to be used in a more efficient manner. These economical racks are both durable and provide labor savings by keeping your bulky pots and utensils in the area where they are needed. The wall mount, table mount and ceiling mount units arrive with one hook per lineal foot of rack and are easily installed to the proper fixture. They also may be added as your requirements and need for more horizontal space increases.
